DROP

Design by Cristian Cubiñá

DROP designed by Cristian Cubiñá

The DROP pendant collection is a classic by Alma Light, designed in 2006 became one of our flagships, our most well-known luminaire. It stands out above all for its famous transparent glass in the shape of a drop and for its great variety of models.

What we love about DROP is its brightness, its luminosity, its visibility, its presence. DROP is beautiful and eye-catching, and when lit it creates a show of brilliance and brings a lot of light. It is ideal to be placed in homes, retail and dining spaces and it combines especially with contemporary interiors that include details of select design and a lot of modernity.

The DROP cluster includes as standard features 2 models: 19 lights and 37 lights. Each of them is available in three lengths: 'S' of 70cm, 'Standard' of 170cm and 'XL' of 350cm, specially designed for double high ceilings. Other versions are available as rectangular 24 lights, square 16 lights, single pendant or downlight version. The structure is made of chromed iron and the shades are made of borosilicate transparent blown glass. But the most interesting part of the collection is that it can be endless customizable !! Just bring your idea and we make it happen.
