

At ALMA Light we love to show off what we do, and we are excited that our products reach all markets. And social networks help us a lot to make ourselves known.

Our Instagram account is called @almalightbarcelona and we usually upload several weekly entries: we echo projects in which one of our light fixtures participates, or we post photos of our lamps set in different decorative styles. We also show the 'making of' of our products with images or videos of the manufacturing process, or sometimes we even provide advice on lighting and the technology we work with. Similarly, every time we launch a newsletter, we share it in the feed. We share photos or videos in 'stories' as well.

If you decide to follow us, you will be able to enjoy all this content... and you may use it as a source of inspiration!

You can visit our Instagram and become a follower of ALMA Light by clicking here and then clicking on the "Follow" button
