

A 2023 full of novelties from ALMA Light

The year 2023 has so far been loaded with presentations of new products at ALMA Light, with one novelty per month. We have launched the Totem II collection of floor and hanging lamps, the MiniSpot collection of floor, table and wall lamps, and the Tribeca Chandelier pendants with a great number of possible combinations based on just three references.

We manufacture light fixtures that are small works of art, pieces of contemporary design with a Mediterranean touch, artisan spirit, well-crafted models, whose manufacturing is carried out in our own workshop in Barcelona. Our products are true objects of desire, elegant and original, made with noble materials. That is why each newsletter provokes a wave of reactions that gives us super positive feedback... and encourages us to move forward. New presentations are coming in the months to come, until the full 2023 catalog is completed!

The time has also come to update our price list, which will come into effect on April 25, 2023. You can request the price list by clicking here:
