

ALMA light

Barcelona

[View online version](#)

In the ALMA Light catalog, there are collections available with a satin gold finish, such as TheLight and ThePalm. Here, 'golden' is not just an adjective: each piece is coated with an electrolytic layer of genuine 24 karat gold, the same pure gold used in fine jewelry.

The result is a refined, luminous, and elegant finish that cannot be replicated through other processes. The 24 karat gold brings a unique and sophisticated tone capable of transforming any environment: from minimalist interiors seeking contrast to classic spaces that embrace elegance in its purest form. Every ThePalm or TheLight light fixture with a satin gold finish becomes a true luxury object.

At ALMA Light, we are committed to excellence. That is why our luminaires stand out not only for their design, but also for the quality of their finish. It is an investment in beauty and character, created for those who appreciate high end details.
