ALMA Light proposals for autumn

With the increasingly dark days of autumn, we are willing to enjoy the warmth of our home, the duration of natural light begins to decrease and we need to use more artificial light.

The ALMA Light catalog is full of lighting proposals for this season, in floor, table, wall or ceiling applications. Of all of them, we would like to highlight the following...

[All collections by ALMA Light](#)

We can provide our bedroom with direct lighting for reading in bed, such as MINIFLAT or MINISPOT for the headboard. We can also give it a touch of 'vintage' design with the

TRIBECA collection of light fixtures that provide more indirect lighting: the LED light is filtered through its alabaster spheres creating, together with the textiles and accessories of this piece, a warm and relaxing atmosphere so appealing in this season of the year.

It is time to create a cozy reading corner by placing, for example, a FUJI floor lamp next to our favorite armchair, with the organic texture of alabaster,

or a PICA floor lamp next to the sofa, with its combination of iron and cotton, to snuggle up under a blanket and get lost in the pages of a good book.

And why not, even though summer is over, it is always a good idea to decorate outdoor areas where it gets dark earlier, giving them a 'chillout' touch with our battery-operated wireless models, such as BELL, PATIO, TRIBECA USB, CUADRAT or NAUTIC, thus creating autumnal atmospheres even at night.
