

At ALMA Light we are proud that our light fixtures are present in projects around the world. Little by little we are compiling photographs of decorations made with our products, thanks to the fact that numerous clients keep sending us images of their installations.

Monbull Space (Madrid, Spain) Elizabethan palace in the Salamanca district - Old dwellings of the Marquis of Cubas, 19th century Renovation carried out by architect Juanjo Jiménez Photos: www.monbull.com Project: Años Luz Iluminacion

We include them in the "Projects" section of our website, on our Instagram and other social network pages. In this way, we are all creating synergies and adding value, because ALMA Light makes its designs known and, at the same time, broadcasts the activities of its clients, whether it is an interior design company, a restaurant or hotel, a retail space, a health or educational center... or even a private home whose interior designers have given due importance to lighting and want to show off the result.

Private home (Brussels, Belgium) Project: Isabel Gomez Studio (www.isabelgomezstudio.com) / [@isabel_gomez_studio](https://www.instagram.com/isabel_gomez_studio)

What about you? Have you carried out any project with ALMA Light luminaires that you wish to show? Do you have images that you would like to share with us in the inspiration gallery that are our projects tab and our Instagram? If so, do not hesitate to send them over to info@almalight.com or tag us [@almalightbarcelona](https://www.instagram.com/almalightbarcelona).
