## FOLD, a really versatile collection

If there is a versatile light fixture in our current catalog, this is undoubtedly our FOLD, a design by Andrea Gelpí (Blaumel Studio) for ALMA Light that embodies the essence of simplicity, sustainability and minimalism.

Its two sizes give a lot of play as they can be combined with each other, both on the floor and on the surface of a piece of furniture.

The structure made of perforated metal sheet allows light to filter through its tiny holes, generating interesting lighting effects around it.

FOLD  
ALMA Light

The FOLD collection is equally versatile as it comes in two versions: FOLD IN, indoor, with cable, plug and completely spherical Triplex opal glass shade, highly decorative in any space in the home. The outdoor version, FOLD OUT, has the same structure but represents a different concept: cordless, long-range battery operated (which allows it to be taken it anywhere), rechargeable via USB, and with an integrated LED module that can be dimmed with a remote control, capable of creating different environments on a terrace, garden or outdoor space.
