## FOLD, selected for the Delta Awards

Design Andrea Gelpí

### ALMA Light

The FOLD table lamp manufactured by ALMA Light has been selected for the 2024 edition of the DELTA Awards organized by the Industrial Design Association for the Promotion of Arts and Design (ADI-FAD), in its 'Lighting' category.

Delta Selection  
ADI Awards 2024

In the words of its designer, Andrea Gelpi of Blaumel Studio, the FOLD collection “has been designed under the premise of sustainability, minimalism in materials and industrial processes. It is made of a single material and its intertwined shape acts as a structure. The perforated metal sheet allows light to filter through its holes, generating different light perceptions around it. Depending on where it is placed, it produces one light or another. The intertwined shape of its body allows us to contemplate all its layers. FOLD is designed to be placed both on the floor as a supporting light next to an armchair or sofa, or providing light to a corner... as well as on surfaces such as a shelf, table or nightstand, hallway or auxiliary furniture, providing an even more beautiful when its two sizes are combined next to each other.”

At ALMA Light we are super excited about this nomination. We wish our little FOLD all the luck in the world in this contest!

Fold ha sido diseñada bajo la premisa de la sostenibilidad, minimalismo en materiales y procesos industriales. Está hecha de un solo material y su forma entrelazada hace de estructura. La chapa metálica perforada permite que la luz se filtre a través de sus orificios, generando distintas percepciones lumínicas a su alrededor. Según se coloque, produce una luz u otra. La forma entrelazada de su cuerpo permite contemplar todas sus capas. Fold está pensada para situarse tanto en el suelo como luz de apoyo junto a una butaca o sofá, o aportando luz a un rincón... como en superficies como estantería, mesa o mesita de noche, mueble de vestíbulo o mueble auxiliar, brindando un efecto aún más bonito cuando se combinan sus dos tamaños uno junto al otro.

Fold has been designed under the premise of sustainability, minimalism in materials, and industrial processes. It is made from a single material, and its interwoven shape serves as its structure. The perforated metal sheet allows light to filter through its holes, creating different lighting perceptions around it. Depending on its placement, it produces one type of light or another. The interwoven shape of its body allows you to contemplate all its layers. Fold is intended to be placed on the floor as ambient light next to an armchair or sofa, or providing light to a corner... as well as on surfaces such as a shelf, table, or nightstand, foyer furniture, or auxiliary furniture, creating an even more beautiful effect when its two sizes are combined side by side.
