Fold Out ALMA Light

Design Andrea Gelpí (Blaumel Studio)

[Ver versión online](#)

After the launch of Fold for indoor use designed by Andrea Gelpí (Blauemel Studio), we now present Fold OUT, the outdoor version of this original collection. In this case, to its concept, functional design and ecological approach, is added the possibility of installing Fold OUT anywhere, indoors or outdoors, as it is a USB rechargeable battery lamp and, therefore, autonomous and wireless. Fold OUT offers great versatility when it comes to transporting it, moving it from one location to another and installing it wherever desired, indoors or outdoors.

Fold OUT is highly decorative and adds design to any space as a supporting light and as an atmosphere creator. The perforated metal sheet of its structure allows light to filter in, generating different atmospheres and transmitting sobriety and elegance. In addition, the Fold OUT LED is dimmable, so you can comfortably adapt the level of light with a practical remote control, or using the switch/dimmer located at the base. Fold OUT can be placed on the ground or on surfaces, either on a piece of furniture or shelving inside the house, or in outdoor locations such as terrace, porch, garden, pool area, chill-out area or yachts.

We truly love it.
What about you... do you like it?
