

New catalogue ALMA Light 2024-2025

[Ver versión online](#)

After a 2023 with quite a number of launches of ALMA Light collections, the new ALMA Light 2024-2025 catalog is finally available, which includes all these new lamps and adds others still unpublished. The corporate color chosen on this occasion and that will accompany us for two seasons is ochre yellow, selected for its liveliness and its warm & happy connotations.

The collections, indoor and outdoor, are designed for both the home and facilities, and integrate an artisanal and very well-crafted spirit with designs with clean, elegant and original lines. At ALMA Light we continue to rely on national designers, with new additions to the creative team such as Ms. Andrea Gelpí, Mr. Héctor Serrano and the Ozestudi team. Our luminaires are manufactured in our own factory under parameters of proximity, responsible consumption, materials of national origin and environmental criteria. We continue to prioritize noble materials such as wood, glass, iron or alabaster, and for the first time we include collections made with recycled materials, so that sustainability and the environment acquire their due importance in this catalog.

Each of the light fixtures that make up the catalog has been developed with care by our design and technical department teams, and are a small work of art that provide a decorative and contemporary touch to each space, generating positive emotions and captivating with its unmistakable 'Made in Barcelona' touch.

The result is a beautiful, attractive, contemporary 2024-2025 collection capable of providing light, design and a Mediterranean spirit to a home, a hotel, a commercial premises or a hotel or restaurant space.
