## Design Josep Novell & Josep Puig

[View online version](#)

Today we are showing you a video that resolves all your doubts regarding PotLight, the new and original ALMA Light table lamp designed by Josep Novell & Josep Puig.

At the beginning of the video you will see the exploded view, that is, the ceramic base of the lamp on one side, and the two glasses on the other. Look how easy it is to assemble it, it's just a matter of placing one glass inside another and then placing the bulb in the order you prefer. It doesn't matter how you get there, as long as you get there!

You can now turn the light on: the PotLight table lamp is beautiful as it is, plain, naked

And from here... PotLight let's play! The 2cm space between the two shades facilitates your creativity... you can place whatever comes to mind in that space (as long as it is not liquid), whether it is a pleated fabric or gift wrapping paper, strands of colored wool (as in the video), or little balls, wood shavings, noodles, popcorn, family photos, written messages...

Enjoy your PotLight and the endless customization possibilities it offers!
