## Tribeca USB

design Jordi Llopis

ALMA Light

The Il Figo restaurant recently opened its doors in the town of Al Khobar, in the heart of Arabia. Aimed at a young clientele, the restaurant's atmosphere is casual and cheerful, with very careful details such as brightly colored ceramic tableware and an extensive menu.

It is on the terrace of this restaurant where we want to focus... because our TRIBECA USB battery-operated wireless lamp shines with its own light on the terrace tables, with its unmistakable spherical alabaster lampshade. The TRIBECA USB shade is capable of filtering light to illuminate the dishes and the table, and at the same time create a super pleasant atmosphere. Designed by Jordi Llopis and made with noble materials, this small light fixture provides an organic and very natural touch to this new and innovative establishment, blending into a culture so different from ours, thus showing its infinite versatility.

We love how it looks. And you? What do you think?

Do you have a project with photos that you would like to share?
