STAR

A Hollywood inspired collection, designed by Cristian Cubina

Star designed by Cristian Cubina

The STAR collection by ALMALight is a design signed by Cristian Cubina, with its unmistakable white shade of clean shapes and a glossy foot, white or black. The name of the collection responds to its Hollywood inspiration, a homage to its 'star system'.

STAR has a functional, modern and elegant design, timeless but with a classic and universal touch. It has three features that define it: The shade in a hemispherical shape, its conical foot, which provides stability, and thirdly, its high light-performance thanks to the methacrylate of the shade, that leads much light pass through it and, at the same time, avoids dazzling.

The collection consists of two versions: table and floor. It comes in two finishes: one painted in glossy white and the other in glossy black. The shade is always white and socket is E27 in all cases.
