Barcelona

[View online version](#)

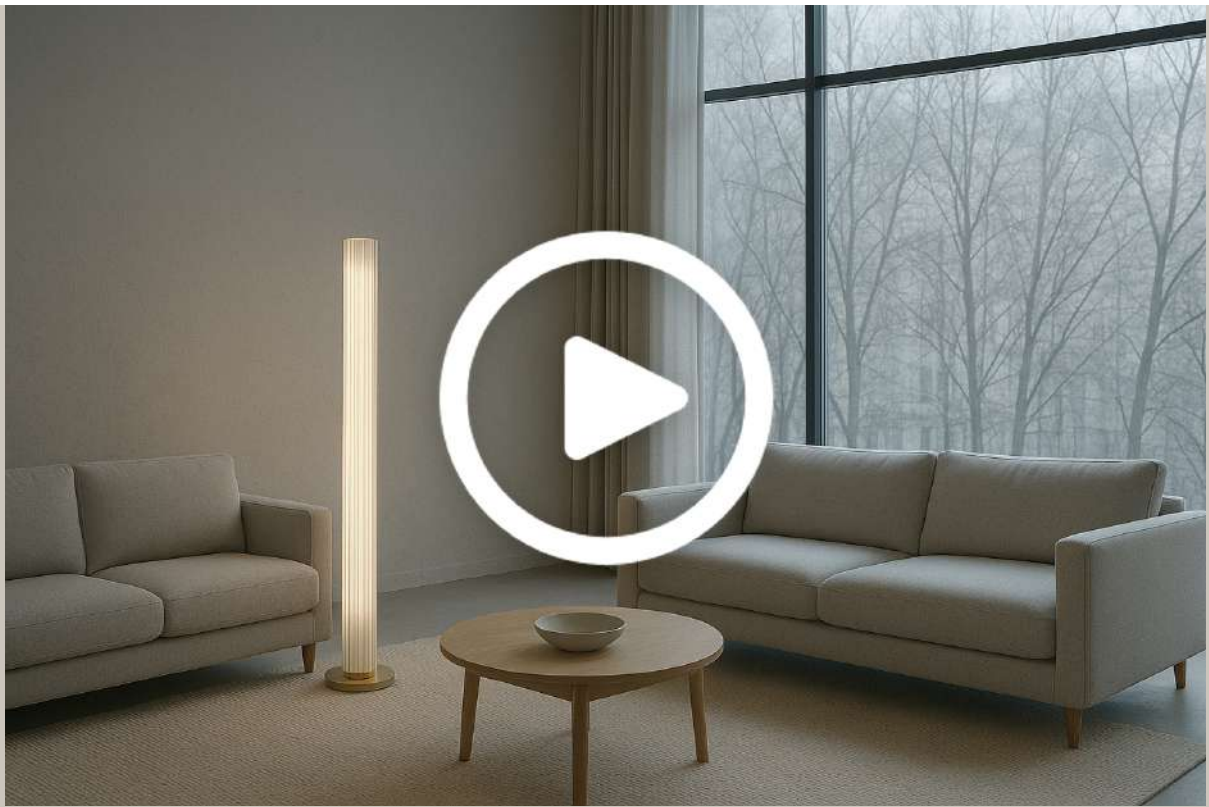

Since ancient times, and across all early cultures around the world, totems have stood as ascending symbols, emblems of collective identity, connection, and ritual verticality. TOTEM I, designed by Cristian Cubina, draws from that heritage and reinterprets it in a contemporary key: a luminous column of glass that turns any space into a meeting point between design and emotion. TOTEM I is not just a lamp, it is rather a vertical presence that subtly imposes character.

Its transparent fluted borosilicate glass cylinder emits light in 360 degrees, creating a warm and enveloping atmosphere. TOTEM I is ideal for living rooms, commercial spaces, hotel common areas, restaurants, waiting rooms, or large-scale installations. Its design combines iron and glass, expressing delicate contrasts: strength and softness, weight and lightness, presence and discretion.

TOTEM I is more than light fixture. It is a vertical gesture that connects past and future, tradition and avant-garde. Discover it in our catalog and transform your space with a new ritual of light.
