TRIBECA

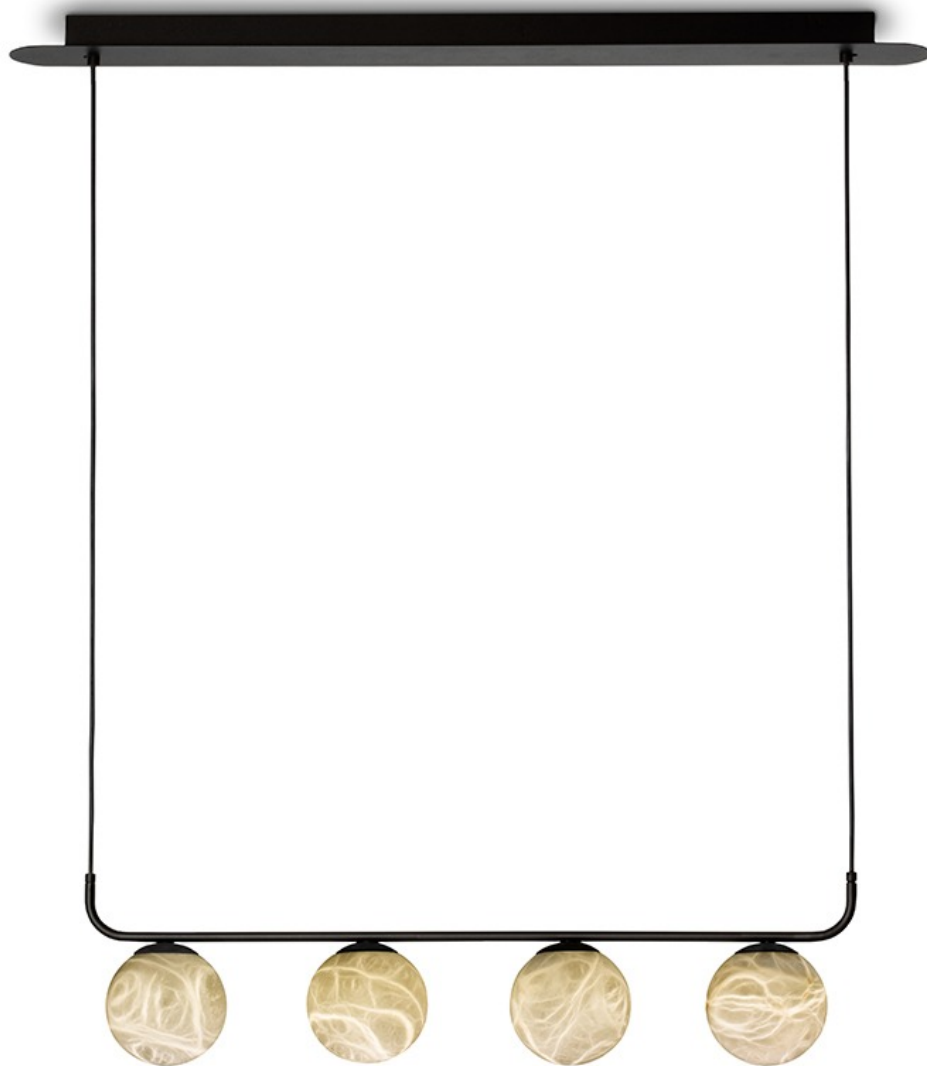

Design by Jordi Llopis

TRIBECA is a handcrafted collection with a retro, elegant and minimalist look. The alabaster conveys a great deal of warmth and gives a spectacular look when the light is turned on, and a wonderful appearance when it is off. The style of the collection fits perfectly into the decorations that come: with it, we are creating a trend. On the other hand, the structures are simple, contrasting with the 'heaviness' of the stone. TRIBECA finds a perfect balance in the contrast between weight and lightness.

Although that today we want to highlight the 4 light pendant version that fits so well to light home dining spaces, the collection consists of a pendant with one shade, and another one with two overlapping shades, a table lamp and two floor lamps, also with one shade and with two overlapping shades. But we can also easily customize the structures to your project needs!! The structures are made of textured black painted metal, and they all include Seoul 4.5W 2700K 270lm LED.
