

TRIBECA

Design by Jordi Llopis

Tribeca designed by Jordi Llopis

TRIBECA is a handcrafted collection with a retro, elegant and minimalist look. The alabaster round shades conveys a great deal of warmth and gives a spectacular look when the light is turned on, and a wonderful appearance when it is off. The style of the collection fits perfectly into the decorations that come: with it, we are creating a trend. On the other hand, the structures are simple, contrasting with the 'heaviness' of the stone. TRIBECA finds a perfect balance in the contrast between weight and lightness.

The collection consists of wand or ceiling lamp, wall lamp including reading arm, downlight, a pendant with one shade, and another one with two overlapping shades; a pendant with four shades and linear ceiling plate, a table lamp and two floor lamps, also with one shade and with two overlapping shades. The structures are made of textured black painted metal, and they all include dimmable Seoul 4.5W 2700K 270lm LED. The floor and table versions can include intensity dimmers to create an even more intimate atmosphere.
