ALMA Light
Design Cristian Cubiña

[View online version](#)

The Soft pendant collection, a design by Cristian Cubiña that has been one of ALMA Light's best-sellers for some time, up to now was made with pink and black blown Bohemia Crystal shades, and its structures were available in satin nickel. Well, now the collection is expanding, with new shades painted in gradient white, and with structures painted in textured white.

From now on, the Soft collection will be made up of its three classic pendant models (single, four-light linear canopy and five-light round canopy) where the two glass sizes (12cm or 16cm in diameter) can be pink, black... or white! The structures will now be available in two finishes: in satin nickel for the pink or black shades, or painted in textured white for the new white shades. The light sources are still integrated Seoul 4.5W 372lm 2700K LEDs, not adjustable in intensity and the driver is, as always, included inside the canopy.

What are you waiting for? The new white Soft is looking forward to being part of your projects!
