

Now that the good weather begins and activities in nature or in outdoor spaces are imposed, ALMA Light proposes five USB-rechargeable battery lights 100% made in Barcelona, that can be taken literally anywhere.

Cordless, with LED technology, long autonomy and the possibility of dimming the intensity of the light, the ALMA Light USBs are perfect for any occasion and place, and only need a USB charger like that of any Android phone.

1 – PATIO, with silver or gold structure, in a high or low version, this small table lamp offers up to three defined light intensities (strong, medium and soft) to adapt to every atmosphere.

2 – TRIBECA, white, black or corten-brown, high or low, always with its alabaster shade. With 'touch/dimmer' button on the base, to dim the light intensity.

3 - CUADRAT can be hung by means of its leather strip and thus configured as a hanging lamp, or it can be placed on a surface with the function of a table lamp. It includes touch/dimmer button to dim light intensity. It also comes in three colors: white, black or corten-brown.

4 - BELL, a design with exotic touches, weather-resistant tropical iroco wood and varnished brass lampshade; It is ideal as a point of ambient light. Its intensity can also be dimmed.

5 – NAUTIC, with Mediterranean airs, the most marine battery lamp of the five, can be placed on the ground or on any surface. It comes in three colors: white, black or corten-brown, its light is adjustable in intensity and it has a hook that allows it to be hung.

**Finally, for all the models, and for special projects, ALMA Light can produce customized finishes!**
