The in-trend lamps by ALMA Light

At ALMA Light we have a wide range of floor lamps that, in addition to the advanced technology that meets the most demanding standards in terms of quality, sustainability and energy efficiency, are true gems as far as design and materials are concerned, and are in line with the most current trends in lighting.

In the field of sustainable materials, our floor lamps include different glasses, such as the transparent fluted glass of TOTEM I and TOTEM II or the genuine Bohemian crystal of DECO. As for fabrics, we have the traditional cotton of the shades of the HOTEL, WORK or PICA collections, or the latest generation textile fiber that makes up the body of BIG BROTHER. Iron, raw or with different finishes, constitutes the structure of most of our floor lamps, with special emphasis on PICA, MINISPOT or STAR. And finally, one of the most current trends: the polished natural alabaster of the FUJI, PAROS ALABASTER or TRIBECA shades, a translucent stone with a unique aesthetic, capable

of filtering light, creating a healthy and relaxing environment that connects us with Nature.
