THELIGHT

Design by Cristian Cubina

TheLight designed by Cristian Cubina

TheLight combines obvious 'vintage' reminiscences with an air of extreme modernity. Its visibility, its striking appearance, its spectacular yet serene and very modern look, bring a high degree of elegance to any space. Besides, it is a versatile luminaire, which combines with all kinds of interior designs.

TheLight is produced in three sizes: 12 arms, 18 arms and 30 arms. These arms end up forming the central body of the fitting, when all assembled side by side.

TheLight is made of iron, in metallic finishes -gold or nickel- or painted. At the end of each arm there are two LEDs, one above and one below, of the type Cree 3W, 2700K, which light up a diffuser made of sandblasted methacrylate. The diffusers produce a pleasant and powerful sieved light that does not dazzle. The THELIGHT collection is not dimmable, but can be ordered in an dimmable version (in 18 and 30 arms only) if required.
