TheLight by ALMA Light, a true classic

[View online version](#)

The THELIGHT pendants by ALMA Light, designed by Cristian Cubina, embody beauty, dimension, character, technology and that theatrical touch that transforms any space. This collection has brought us so much joy and has shone in so many spectacular projects around the world, that today we can truly call it a classic.

THELIGHT reimagines traditional chandeliers through a radically contemporary lens. In any interior design, it stands out as something special, unexpected, and contrasting —it never goes unnoticed. It's a piece with a vintage soul and modern presence, equipped with LED technology to ensure that aesthetics and efficiency go hand in hand. At the same time, it strikes a perfect balance between drama and serenity, adapting gracefully to residential, hospitality or commercial projects. If your space needs a fixture with personality, THELIGHT might be exactly what you are looking for.

These chandeliers are available in three sizes: 12, 18, and 30 arms, and come in satin gold or nickel finishes, or painted in white or black... although they can be customized in any other color if you specify your preferred RAL tone. The light sources are integrated LEDs that illuminate a solid sandblasted methacrylate block. The light is warm, diffused and glare-free. And if your project requires dimming, we can adapt it as well.
