Custom finishes and versions: For finishes/colors different from the standard ones, special designs or customized formats, please contact ALMA Light.

Flat Led es un aplique de cabecero de cama con un aspecto sobrio y una fuerte personalidad. Destaca su serenidad, su simplicidad, su estilo urbano y contemporáneo, su solidez. Flat Led es una feliz combinación entre un plano metálico rectangular de luz indirecta que baña todo el espacio a su alrededor, y la línea que dibuja su brazo lector con LED integrado, que se puede direccionar hacia donde el usuario desee. Flat Led es ideal para ser instalada en dormitorios. Como se trata de un producto robusto, es especialmente idóneo para hoteles e instalaciones de 'hospitality'.

La colección Flat Led consta de un solo modelo. Está realizada en hierro y se presenta en acabado pintado texturizado blanco o negro, aunque para proyectos especiales se puede pintar en el color que desee el comprador. El brazo lector contiene un LED no regulable Cree 3W 3000K 260lm 30° CRI>80, con su driver 90-264V.2,5-4,5Vdc.700mA incluido. En la parte trasera de Flat Led se aloja un portalámparas E27 (bombilla no incluida) que permite escoger, de entre todas las posibilidades del mercado, aquella LED que se adapte a sus gustos en cuanto a color de luz. Flat Led está disponible con un solo interruptor on/off para el brazo lector (en este caso la luz trasera funciona con el interruptor de pared en cabecero o habitación), o con dos interruptores, uno on/off para el brazo y otro para la luz trasera.

Flat Led is a bed headboard light with a sober look and a strong personality. Its serenity, its simplicity, its urban and contemporary style, its solidity, are its main features. Flat Led is a happy combination between a metallic rectangular flat piece of indirect light that bathes the entire space around it, and the line drawn by its reading arm with integrated LED, which can be directed wherever the user wishes. Flat Led is ideal to be installed in bedrooms. As it is a robust product, it is especially ideal for hotels and hospitality facilities.

The Flat Led collection consists of a single model. It is made of iron and comes in a white or black textured painted finish, although for special projects it can be painted in the color desired by the buyer. The reading arm contains a non-dimmable LED Cree 3W 3000K 260lm 30° CRI>80, with its 90-264V.2.5-4.5Vdc.700mA driver included. On the back of the Flat Led there is an E27 lamp holder (bulb not included) that allows the election, among all the possibilities on the market, of the LED that suits user's taste in terms of light color. Flat Led is available with a single on/off switch for the reading arm (in this case the rear light works with the wall switch in the headboard or room), or with two switches, one on/off for the arm and another one for the rear light.
